

CERTIFICATE COURSE ON VALUATION OF SECURITIES / FINANCIAL ASSETS (BATCH-2)

(Jointly by ICSI and ICSI RVO)

Valuation is an Art not a Science

The purpose of valuation is to track the effectiveness of strategic decision-making process and to provide the ability to track performance in terms of estimated change in value, not just in revenue.

This certificate course on “Valuation of Securities / Financial Assets” intends to cover various facets including strict timelines as well as finer nuances concerning valuation process. It outlines interalia the practical aspects of the law, and also deals with the functionality required for complying with it. The learnings from the demonstrations and examples will be further augmented by holistic real life examples, which will cover entire curriculum being taught. On completion of the course, the candidates should be able to develop well-structured, robust, and dynamic financial models to perform independent business valuation.
